## COMPANY PROFILE

PROFESSIONAL PCR TIRE MANUFACTURER

Shandong YouYue Rubber Technology Co., Ltd. is located in Zhucheng City, Weifang. It has a superior geographical location and is close to Qingdao Port.

The company is a high-tech industrial group focusing on the research and development, production, sales and foreign trade of semi-steel radial tires and related supporting products. In terms of quality control, the company has passed a number of strict certifications which fully reflects the company's high attention and strict requirements for product quality.

Relying on advanced technology and a professional team, the company is committed to providing customers with high-quality semi-steel radial tire products. In the research and development link, continuous resources are invested in innovation to meet the needs of different markets and customers. In the production process, advanced production processes and equipment are adopted to ensure the stability and reliability of products. In terms of sales and foreign trade, it actively expands domestic and foreign markets and has won wide acclaim from customers with high-quality products and services.

# WHY CHOOSE US ?

## Factory Platform

Direct tire manufacturers, enabling customers worldwide to receive the most direct and effective services.

## Quality & Services

Cutting - edge equipment and technologies, we enhance product performance and stability, and provide faster delivery services, enabling customers worldwide to enjoy a better user experience.

## Research & Development

Professional technological development, driven by continuous innovation, has led to the continuous expansion of the product line and the continuous launch of new products, ensuring a competitive edge in the market.

All of these are just to make you choose with confidence and embark on wonderful journeys around the world together

Energy-saving

M+S

PASSENGER CAR

- **Quiet, safe, energy-saving, and environmentally friendly**

Designed for medium and high-end sedans. It offers exceptional comfort and remarkable noise reduction. At the same time, it excels in wetland handling and demonstrates outstanding high-speed performance.

- **Reinforced Sidewall structure**

The high turn-up design of the tire enhances its sidewall strength. It makes tires more stable in handling and ensures driving safety on complex and diverse road surfaces.

- **Low level of noise**

The slightly asymmetrical tread groove and the rationalized design of grooves provide excellent quiet comfort for driving and riding.

The knurling decoration design at the bottom of the tread groove not only brings aesthetic appearance but also reduces noise.

PERFORMANCE

- **The Advantages of New Asymmetrical Pattern Design**

The new asymmetrical pattern design helps the shoulder groove increase drainage performance and the middle sipe pattern improve high-speed performance. The integrated design provides excellent dry and wet road grip and handling

- **Formula with SSBR and Silicon-Containing Technology**

The formula using the latest solution polymerized styrene-butadiene rubber(SSBR) and silicon-containing technology provides excellent wetland performance and extremely low rolling resistance, as well as excellent handling during high-speed driving

M+S

CROSSOVER SUV

- ### Advantages of Tread Groove and Shoulder Step Designs

The stepped design of the tread groove prevents stones from getting caught when driving on country roads. The decorative 3D step design on the shoulder is beautiful and heat-dissipating

- ### Tread Groove Designs for Excellent Drainage and Hydroplaning Prevention

Four main tread grooves combined with transverse tread grooves to provide excellent drainage performance to ensure driving safety in heavy rain;

The design of curved fine grooves greatly reduces the water film between the road surface and the tire on rainy days, preventing the occurrence of hydroplaning

CARGO VAN

- **The high-strength structure can adapt to various load-bearing requirements**

- **Special exterior design**

The "lightning-shaped" decorative design on the sidewall makes the appearance of the tire beautiful and unique.

- **High-speed stability and maneuverability**

The design of three straight grooves and closed middle shoulder enhance tire strength while greatly reducing tire noise, meeting the low noise requirements of high-end light passenger vehicles;

- **excellent driving stability and handling performance**

The design of continuous tread block on shoulder provides excellent driving stability and handling performance for vehicles under high load conditions;

Driveability

M+S

4X4  
ALL TERRAIN

- Optimize the performance of 4WD drive
- Outstanding all-terrain driving capabilities

- Unique Tiger-Tooth-Shaped Tread Blocks

The unique tiger-tooth-shaped three-dimensional tread blocks can provide excellent traction and high passability on mountain roads, muddy terrains and snowy surfaces alike. They make your vehicle stand out and be more recognizable.

- Advantages of Wider Tire Surface and Shoulder Design

The wider tire surface makes the tire stronger and more three-dimensional. The progressive thickening design on the tire shoulder ensures that the vehicle has lateral support. And the solid white and black letters highlight the quality of the tire even more.

Driveability

M+S

4X4  
OFF ROAD

- Good at vehicle recovery in various tough terrains
- Outstanding performance, with a focus on off-road driving.

- Reinforced structure, stronger adaptability and better vehicle recovery ability

The optimized combination design of huge tread blocks and grooves provides excellent driving force, grip and anti-skid performance on unpaved roads;

Double-layer reinforced belt and special three-layer reinforced carcass design greatly improve the overall strength of the tire and meet the requirements of the worst road conditions

- Challenge harsh road conditions more confidently and enhance the driving pleasure

The design of shoulder groove special protective dam and rough shoulder reinforcement improve the anti-impact ability, thereby greatly improving the durability;

The design of single-wound hexagonal bead greatly improves the durability and stability of the tire bead.

M+S

All-season TIRE

• An all-weather tire with excellent comprehensive performance

• Reliable, Adaptable, Stable, Versatile, Consistent

• Improvements in excellent formulations and structures

Excellent all-weather performance throughout the year;

Asymmetric pattern design ensures dry and wet ground and cornering handling performance.

All-silicon formula provides strong grip on icy wetlands.

WINTER TIRE 

# SURATE **ICE03**

Winter

3PMSF

Passenger Car

M+S

PASSENGER TIRE  

- **The tread's fine 3D ultra-thin groove design**

Asymmetric patterned tires maintain rigidity on the outer side and provide more contact area, improving grip on dry and wet areas as well as sharp turns on ice.

The tread's fine 3D ultra-thin groove design improves grip while ensuring excellent handling and driving performance on ice and snow.

- **Snow removal performance**

More horizontal and multiple pattern grooves intersect, which can fully absorb moisture and avoid the formation of water film. At the same time, they can effectively wrap and form snow columns to improve snow removal performance.

The low-temperature resistant mixed soft rubber formula for the tread has strong grip on snow and ice surfaces, which can ensure excellent handling performance.

WINTER TIRE

# VANCRUISER ICE

Winter

3PMSF

Driveability

M+S

WINTER VAN TIRE

- Safety of driving on icy and snowy roads.

- 3D ultra-thin groove encryption design

The tread adopts two shapes of 3D ultra-thin groove encryption design with reasonable angles to improve the grip while ensuring the handling and driving performance on ice and snow.

- Excellent wear resistance and load capacity

The low-temperature resistant mixed soft rubber formula of the tread enables the tire to remain soft in cold weather. It effectively improves the grip on ice and snow roads and ensures excellent handling performance.
